

Mission statement created by key staff from

Crossley Hall's Inclusion team

Our vision

To ensure we all have the opportunity to succeed in life, we dare to be adventurous with all learning opportunities. We develop resilience in our children by offering real life learning experiences and operate a high level of support and a high level of challenge approach.

We do not see a problem we see a new opportunity to support the development of the child enabling them to access the curriculum.

Different children need different support and as a team we offer a variety support between 7.45am and 5pm. This ensures we cater for real life needs and ensure learning is maximised and we support our community.

By offering a range of interventions we support all students.
We analyse data to be able to identify need before the issue arises.
Every opportunity is a chance to learn and a time to fill a gap.

We operate a nurture provision for children who need support to remove the barriers. By being aware of our children and having strong relationships we are able to know what they need before problems arise, whilst also being able to provide emergency support when sudden issues occur.

A multi-disciplinary approach ensures we have direct accesses to specialists who further increase the support available to our children.

Children are at the centre of everything we do and we challenge whatever needs challenging.

Parents are supported and heard, as we strongly believe they are the experts of their children.
